

Marketing Support
For 8,500 Farmers

Complete Supply Chain Solution
From the Farm Gate to Their Factory

Establishing
Social Infrastructures
for Local Villages

“GROWING RESPONSIBLY” IS OUR CORE PURPOSE

Olam and the Republic of Gabon have created a public private partnership to establish a 28,000 hectare sustainable rubber plantation by following the highest standards of Corporate Responsibility and Sustainability. With the first crop scheduled in 2018 the practices on the plantation strictly follow the Olam Plantations, Concessions and Farms code, Environmental and Social Assessments, High Conservation Values Study and LiDAR mapping of High Carbon Stock Content.

Olam is now producing technically specified rubber marketed as SAC10 and SAC20 at their recently acquired factory SAIC in the Ivory Coast with the objective of a fully traceable raw material supplies by 2020.

Olam Rubber Trading, centred in Olam's Singapore headquarters, is the focal point for marketing and selling the group's production as well as becoming a leading global rubber trader and distributor. Our suppliers are required to follow the Olam Supplier Code and we are members of the Sustainable Natural Rubber initiative.
